

SOFTWARE DEFINED MOBILE NETWORKS SDMN BEYOND LTE NETWORK ARCHITECTURE WILEY SERIES ON COMMUNICATIONS NETWORKING DISTRIBUTED SYSTEMS

Oct 29, 2020

[Software Defined Mobile Networks Sdmn Beyond Lte Network Architecture Wiley Series On Communications Networking Distributed Systems](#)

This book describes the concept of a Software Defined Mobile Network (SDMN), which will impact the network architecture of current LTE (3GPP) networks. SDN will also open up new opportunities for traffic, resource and mobility management, as well as impose new challenges on network security. Therefore, the book addresses the main affected areas such as traffic, resource and mobility management ...

Software Defined Mobile Networks (SDMN). Beyond LTE Network Architecture. Wiley Series on Communications Networking & Distributed Systems Description: Software-Defined Networking (SDN) is one of the promising technologies that provide the required improvements in flexibility, scalability, and performance to future mobile networks to keep up with the expected growth. Thus, Software Defined ...

[Software Defined Mobile Networks: Beyond LTE Architecture ...](#)

Software defined networking (SDN) is an idea that promises to simplify and unify the way that networks are designed and managed. SDN employs an abstraction that separates the control from the data plane and introduces the notion of a logically centralized controller. These concepts provide benefits like increased flexibility in network management, unification of heterogeneous technologies, and ...

A Software-Defined Mobile Network (SDMN) architecture is proposed to enhance the performance, flexibility, and scalability of today's telecommunication networks. However, SDMN features such as centralized controlling, network programmability, and virtualization introduce new security challenges to telecommunication networks. In this article, we present security challenges related to SDMN ...
