Software Rollout Plan and Deployment Checklists - Overview The usual Risk. In general: The last one gets bitten by the dogs. In IT-Projects: The deployment manager is the last one in the IT project chain to hand over the "hot potato" to IT Operations ; Everything not done during the development phase needs to be done during deployment. Our Recommendation. To avoid this unwanted scenario ...

[Deploy applications - Configuration Manager | Microsoft Docs](#)

Software deployment is all of the activities that make a software system available for use. The general deployment process consists of several interrelated activities with possible transitions between them. These activities can occur at the producer side or at the consumer side or both. Because every software system is unique, the precise processes or procedures within each activity can hardly be defined. Therefore, "deployment" should be interpreted as a general process that has to be customize

[Documentation - WPKG | Open Source Software Deployment and...](#)

Despite this, software documentation is a task that gets rushed, is often done badly, and sometimes gets deprioritized or even forgotten about. Before we start talking about what tools you can use to write software documentation, we need to think of a way to make sure the task gets done in the first place. This is where Process Street can help.
